## THE TEACHERS THAT COME TO YOU!

When we're not teaching "little ones," our dedicated instructors are teaching school-aged children how to play their favorite instrument. Founded on one proven principle, Lessons In Your Home believes: Teach the student, and the method will follow. With Lessons In Your Home, the next page will always be an adventure.

## THE SERVICE

Throughout the years, we have found that our lessons are most appreciated in your home or school. We are equipped to teach all styles and levels of music education. Whether you are five or 75, music lessons will always enhance your life. Our young students particularly enjoy recitals, performing and sharing music. Some students enjoy it so much; they study music as a profession.

## OUR GOAL

Our goal remains clear: every student achieves a grasp of the language of music. Through a simple approach, our teachers insure confidence in this language.

# Little Music Makers

[www.lessonsinyourhome.net](http://www.lessonsinyourhome.net)

All children are musical and even young children can sing in tune, keep a beat and develop listening skills. We believe that creating music is the most powerful way to learn. Complex music concepts are best learned in a fun, interactive environment through sing-alongs, dancing, rhythm play, listening and games.

Music education is good for the mind. Experts agree that music can strengthen children's minds and serve as a fundamental skill of learning. Music helps to develop memory skills, stimulates brain connections and can actually make children smarter. In addition, new research suggests that primary music development occurs before age six.

The Little Music Makers program, designed specifically for pre-school aged children, offers quality music classes that allow children to learn the fundamental concepts of music in an educational, interactive and entertaining environment.

Weekly classes give children a solid foundation and help develop a life-long love of music. Activities such as songs, finger play, nursery rhymes, movement, rhythm games and instrument play are designed to develop competency in tonality and rhythm.

A trained music teacher who creates unique lesson plans customized to each class provides the concepts and skills covered in each week's lesson. The age-appropriate programs are carefully geared toward the abilities and learning styles for that particular age.

## Singing

- Both independently and in a group
- Ear training and sight-singing
- Songs from diverse cultures

## Listening

- Classical and folk, well-known melodies and composers
- Rhythm pattern identification
- Interval and chord recognition
- Instrument recognition
- Introduction to periods and styles
- Identify higher/lower, louder/softer, faster/slower and same/different

## Play

- Learn games and activities to identify intervals, pitch and rhythm
- Feel the connection between music and body through movement
- Experiment with various instruments
